[New Brief: Five Pathways to Results Teams in the Spotlight](#)

At the close of its sixth year guiding teams through an outcomes-focused continuous improvement process, the Pathways to Results initiative is pleased to share a new brief, [Pathways to Results: Five Teams, Five Experiences in the Spotlight](#). Authored by Heather McCambly and Edmund Graham, this brief provides a glimpse into the experiences and insights of five institutions in Illinois—**Harry S. Truman College, Illinois Central College, Malcolm X College, Rend Lake College, and Sauk Valley Community College**—that have utilized the PTR process multiple times to

understand and solve student success issues on their college campuses and with their educational and industry partners. Intended for practitioners and policymakers alike, this brief provides a summary of each site's unique experiences with PTR, followed by cross-site themes emerging from implementation of the PTR process, and a set of recommendations for "moving the needle" on student success that stem from the work of PTR teams. [Webinar: How Education Leaders Can Create Next Generation Learning Environments for College and Career Success](#)

August 3, 2015 9:30am-10:30am

In this webinar Dr. Richard Halverson, professor of Educational Leadership and Policy Analysis at the University of Wisconsin-Madison, shares information

and strategies that will be useful for educational leaders as they create innovative, next generation learning environments that facilitate college and career success for all students. Participant will have opportunities for dialogue and to ask questions. To register click [here](#).

[H2P Colleges Improve Equity for Students through Pathways to Results Process](#)

Today at the Health Professions Pathways (H2P) Summit, teams from the nine colleges that make up the consortium are gathering in Cincinnati to reflect on and celebrate four years of working together to build rigorous healthcare pathways that support student achievement. OCCRL, the third party evaluator for

H2P, is hosting the Summit in partnership with the H2P National Office.

As part of the consortium's sustainability efforts, each H2P college participated in the Pathways to Results (PTR) process that involves analysis of disaggregated data on student outcomes to identify and resolve equity gaps. Through PTR, teams have taken steps to improve equity and outcomes for their students in at least one program of study at their college. Their efforts are reflected in the posters that the teams will share at the Summit. OCCRL applauds the H2P colleges' efforts to improve equity and outcomes for all healthcare students.

Other items on the H2P Summit agenda include interactive discussions about evaluation results and lessons learned to scale reformed healthcare education and training to the community colleges throughout the United States. [Read more.](#)
